### 1. Background of the Project

Gulf of Mottama Project is implemented by a consortium led by HELVETAS Swiss Interco operation with core partners: Network Activities Group (NAG) and the International Union for Conservation of Nature (IUCN). Phase 1 GOM Project started in 2015 and ended on April 14, 2018. Phase 2 has started on April 15, 2018, and will be ended in May 2021 and phase 3 is planned to start in June 2021. The project aims to enhance the livelihood sectors and increase incomes of the project's targeted villages through a co-management system and sustainable development, maintain the ecosystem from the deterioration of the endangered species in the Gulf of Mottama area and establish a good governance system among the related multi-stakeholders.

In Myanmar, GOM Project is operational in Mon State (Kyaikhto, Bilin, Thaton Paung, and Chaungzon Townships) and Bago Region (Waw, Thanatpin and Kawa Townships) along the Gulf of Mottama.

### 2. Purpose of Training

To increase small-scale aquaculture farmer's income through improved Aquaculture practice, fish handling, and processing within the Gulf of Mottama area.

### 3. Objective of the Eel Fish Aquaculture Training

- 1) To understand how to produce systematically small-scale eel fish aquaculture at the communities level.
- 2) To benefit small-scale Aquaculture farmers by applying the techniques learned from the training.
- 3) To be able to share the fish farming knowledge gained from the training with others.
