1. Project Background

Smart Power Myanmar has conducted electrification research at your village in November 2021 and interviewed VEC members and some households. During that time, we were at the research stage but now we are in the project implementation stage where we identify villages that want to be connected as part of the program.

The objective of the Shining Bright Project is to increase access to electricity in rural villages where both 11KV lines and transformers have arrived, but many households are not yet connected because of the lack of financing. The main project partners involved are Hana Microfinance which provides loans for households wanting to be connected, Danyarzar EPC Contractor which constructs the distribution network and household connections, and Smart Power Myanmar which organizes and provides support to the village during the implementation.

Network Activities Group (NAG)

No.51, Shukhinthar Street, Rose Garden, Ward – 27, North Dagon Township, Yangon, Myanmar.

Tel: 09-450694361~5, Email: info@nagmyanmar.org, Web: www.nagmyanmar.org

“Shining Bright Package” includes the *electrification loan* for households to finance the village connection, and *construction* to build the village network and household connections. The loans will pay the EPC for the construction.
